

Energy

Project Mission Statement:

Inform city of best practices in municipal energy efficiency management.

Project Description:

Write paper identifying best practices from region and across the nation with examples and links.

Action already accomplished to move project towards Implementation:

Resources Previously Identified by Strategy Group

1 Utility DSM programs EP & NIPSCO (Res &Com.) 2. Indiana energy and building code, 3. Performance Contracts (local & Regional), 4. PEM & LEM (Energy EFF Mortgage) 5. Center for Sustainable Energy, Transpo Building Model, Zoning/policy level change to support small housing, City of Chicago practices- municipal green roofs, etc, NNN rehab houses, Inovateus Solar, Developers, Energy Savings Statistics – variety of building scales

Potential Project Parking Lot:

Green revolving loan fund

Centralize energy management plan

Project Outline

1. **Approach** Describe how the project will be carried out and managed

1. Write paper complete and distribute
2. Training of unit heads in PPA
3. Pilot building /unit one city

Next step: find and champion – one unit buy in (make them successful, who/what to showcase)
Century Center or other facility (Fire Dept, Parks HQ, Affordable housing complex)

1. Check champion – get baseline
2. Educate/Audits/Implementation
3. Measure results

2. **Timeframe & Milestones** Describe the overall timeframe for the main steps in the project, and the milestones/checkpoints in each step

1. Identify champion
2. Get base line
3. Conduct audit
4. Identify action
5. Implement
6. Measure
